

Bergen-Passaic Eye Surgery Expansion

Outpatient Services Focus

Location

Fair Lawn, New Jersey

Client

SCA Health

Client Type

Healthcare

Size

15,000 SF

The Opportunity

PS&S was given the opportunity to provide Design Services for expansion of the Bergen-Passaic Surgery Center. Design Services included Architectural & Interior Design, and Construction Administration.

The Challenge

The challenge was to develop a solution that upgraded a significant portion of the existing Center while allowing a full surgical schedule to continue throughout the alterations and expansion.

The PS&S Solution

PS&S incorporated phasing that allowed the construction of an expansion area which included two new operating rooms, new sterile processing department, clean supply & waste holding rooms, new assessment and procedure rooms, and staff area upgrades. PS&S also converted the Pre-Op / Recovery area to flexible patient care stations to accommodate the increased patient case flow.
